

VISHWAS SONKER

B.Tech student specializing in Artificial Intelligence and Data Science

☎ +917223908740 ✉ vishwasprofessional25@gmail.com 🌐 Leetcode 📄 LinkedIn 🐙 GitHub 📍 Jabalpur

EDUCATIONS

Jabalpur Engineering College M.P <i>B.Tech in Artificial Intelligence & Data Science, Ongoing</i>	2023 - 2027 CGPA : 7
Maharishi Vidya Mandir Jabalpur, M.P <i>Class 12</i>	2022 - 2023 percentage : 77%
Maharshi Vidya Mandir Jabalpur, M.P <i>Class 10</i>	2021 - 2022 percentage : 70%

PROJECTS

Own AI – Custom Vector Database & RAG Engine | 🐙 Github

Developer

- **Built a custom vector database** in C++ implementing HNSW, KD-Tree, and Brute Force nearest-neighbor search algorithms.
- Integrated Ollama embeddings and local LLMs to develop a Retrieval-Augmented Generation (RAG) system with semantic search, document retrieval, and interactive visualization.
- Clean and interactive user interface using **HTML, CSS** and **Javascript**.

Technologies / Tools Used : C++, RAG, Ollama, html, css, javascript

AutoValue - Car Price Prediction | 🐙 Github 🌐 Website

Developer

- Developed a machine learning application for predicting vehicle MSRP using **Linear Regression** achieving a **0.92 R² score** on the test set.
- Conducted data cleaning, numerical feature extraction, and one-hot encoding for categorical vehicle attributes.
- Deployed an interactive **Streamlit** interface for real-time price prediction.
- Evaluated model performance using **R², RMSE, and MAE**, and analyzed feature importance with a Decision Tree.

Technologies / Tools Used : scikit-learn, streamlit, machine learning, python

Netflix Content-Based Recommendation System | 🐙 Github △ Vercel

Developer

- Developed a content-based recommendation system that recommends Top-10 similar Netflix movies and TV shows.
- Utilized **TF-IDF vectorization and cosine similarity** on title, genre, cast, director, and description metadata.
- Built a Flask web application featuring title autocomplete, robust input handling, similarity scoring, and a responsive Netflix-inspired UI.

Technologies / Tools Used : python, scikit-learn, flask

Hospital Management System | 🐙 Github

Developer

Developed a console-based hospital management system using linked lists and queue-based patient management, supporting multiple departments and priority handling for critically ill patients. Implemented features include:

- **Patient registration** with duplicate ID validation.
- **Patient search** and queue operations.
- **Department-wise patient tracking.**

Technologies / Tools Used : C++, STL

SKILLS

Databases :	MySQL
Frameworks & Libraries :	NumPy, Pandas, Matplotlib, Seaborn, Scikit Learn, Tensorflow, Pytorch, Django, Flask
Languages :	English, Hindi
Programming Languages :	C, C++, Python, SQL, HTML, CSS, Java
Soft Skills :	Problem-Solving, Teamwork, Adaptability, Leadership
Tools & Platforms :	Git, GitHub
